Technical Bulletin

Dated: REVISIED: *February 9, 2023

Re: DIRTcar Dot Foods Sportsman

Dot Foods Sportsman weekly events at Fulton and Brewerton will run under the governance of the DIRTcar Rulebook in 2023 with the following exceptions:

1. Chevrolet Performance Crate Engines
 - a. Cars may only be powered with Chevrolet Performance 602 crate engines with factory OEM GM seals. Engines that have been repaired, rebuilt and resealed will not be permitted. The blue DIRTcar verification seal in conjunction with factory GM seals is optimal. Black verification seals are not permitted.
 - b. It is illegal to graphically promote an engine builder or engine performance center other than "Chevrolet Performance" on the body or on any part of the race car, including engine and valve covers. It will also be illegal to verbally reference or promote an engine builder or engine performance center in a victory lane interview.
2. Minimum Weight:
 - a. All cars must meet a minimum post-race weight of 2400 lbs with driver.
3. Wheel Covers:
 - a. Left side wheel covers/mud plugs on all cars in weekly racing competition at Brewerton and Fulton Speedways may be made up of foam or similar soft construction only. Plastic, lexan, aluminum or similar hard disc style covers are not permitted for use on left front or left rear wheels.

DIRTcar Sportsman series events at Fulton (July 29 and August 16) and Brewerton (June 23) will be governed by the 2023 DIRTcar Rulebook in full.

Call (315) 638-4056 or email marketing@brewertonspeedway.com with any questions.
